

Case Study – Mechanical Design Generic Engineering – Design Automation

Application	Parametric Table assembly Generator
Scope	<ul style="list-style-type: none"> Design automation development for a table assembly with parametric and options driven
Approach	<ul style="list-style-type: none"> Application specifications Requirements validation and analysis Application design Construction and testing Integration testing in a Solid works environment with libraries/Std.Parts Production release
Software	<ul style="list-style-type: none"> Solid works, VB, XML

Engineer the future
